

JORDAN FOR COMMUNITIES

CHANGE - GROWTH - REPRESENTATION

CHANGE IS COMING

The Covid Pandemic has changed how we work, study, live and socialise. I want to prepare our Diverse Student Body and our amazing Clubs and Societies for a post-covid University - ensuring that there is effective mechanisms to make sure ALL Students are represented and have their voices heard

OPPORTUNITY FOR GROWTH

**There will be a boom in all things
Communities Post Covid**

With the UK no longer in the EU, the University of Limerick is expecting a huge increase in International Students. Coupled with growth in C&S Post Covid, there is potential for a veritable renaissance in Student Engagement in UL, but it needs a lot of ground work and input from all sectors of the Diverse Student Body

REPRESENTATION IS KEY

**It is vital that the Student Voice is sought out
and heard as we enter this exciting period**

There must be effective mechanisms for surveying the Student Body and ensuring there is real representation for the many diverse cultures and identities in the university. The Current Structures should be evaluated and innovative ideas must be brought to the fore
